

Q2.1 Service Model - Clinical and Operational Workflows

High Med Ltd + Dr Singh Hammond Road consortium | Lot 4 Sudbury Surgery (E84685) | Atamis C444743

Access and care navigation

Single point of contact with care navigation and same-day clinical assessment; duty GP/NP for urgent need and home visits throughout core hours; choice of consultation mode and named clinician for continuity.

Proactive care and recall (rolling 12-month cycle)

Workflow	Method	Owner
QOF and LTC annual reviews	Register search, structured recall, birthday-month model	Dr Singh
National screening (cervical, bowel, breast, AAA, DES)	Call/recall, DNA follow-up	Nursing team
Childhood & seasonal immunisations	Call/recall, opportunistic, outreach	Dr Saira Safeer
Medication reviews / SMRs	Risk-prioritised, pharmacist-led	Dr Singh / PCN pharmacist

Safe operational workflows

- Repeat prescribing SOP with re-authorisation and synchronised quantities.
- Results, documents and tasks with safety-netting and failsafe tracking.
- Referrals via e-RS with two-week-wait tracking.
- Care navigation protocols and scripts for reception staff.

Monitoring

All workflows monitored via the clinical system and population-health dashboard with monthly KPI review and exception reporting.
